Dans le fichier /etc/mediawiki/LocalSettings.php on trouve les lignes suivantes :

```
## For attaching licensing metadata to pages, and displaying an
## appropriate copyright notice / icon. GNU Free Documentation
## License and Creative Commons licenses are supported so far.
$wgEnableCreativeCommonsRdf = true;
$wgRightsPage = ""; # Set to the title of a wiki page that describes your license/copyright
$wgRightsUrl = "http://creativecommons.org/licenses/by-sa/3.0/deed.fr";
$wgRightsText = "Creative Commons Attribution-ShareAlike License";
$wgRightsIcon = "/skins/common/images/icons/cc-by-sa.png";
# $wgRightsCode = ""; # Not yet used
```

L'idée est de créer une page Licence contenant le texte des licences du wiki, de la protéger et de la lier via \$wgRightsPage = "Licence";
