```

A priori, un problème de template : **panic: template: home:12: function "StaticUrlPrefix" not defined**

Confirmation en regardant l'historique du fichier .../template/home.tmpl :

```
2021-05-08 16:27 +0200 silverwind o Rename StaticUrlPrefix to AssetUrlPrefix (#15779)
```

Le commit est explicite : <https://github.com/go-gitea/gitea/pull/15779>

```
warning BREAKING warning
Administrators with Custom templates that use the StaticUrlPrefix will need update these to use AssetUrlPrefix
.
```

La modification à faire dans agir:/srv/gitea/custom/templates/home.tmpl pour que ça refonctionne :

```
- 
+ 
```
