Both iptraf (buster) and iptraf-ng (bullseye) packages were installed.

Resolution: remove obsolete packages were purged (gcc-8-base, openssh-blacklist, openssh-blacklist-extra, multiarch-support, lynx-cur, iptraf, libxtables10, libreadline5, libmpfr4, liblvm2cmd2.02, liblogging-stdlog0, libgdbm3, libffi6, libcryptsetup4, heirloom-mailx, gcc-4.9-base, libreadline7)

I kept the following packages:

```
apt policy vim-icinga2 libnagios-plugin-perl
vim-icinga2:
  Installed: 2.13.2-1.buster
  Candidate: 2.13.2-1.buster
  Version table:
*** 2.13.2-1.buster 100
    100 /var/lib/dpkg/status
 2.12.3-1 500
    500 http://ftp.fr.debian.org/debian bullseye/main amd64 Packages
libnagios-plugin-perl:
```

```
Installed: 0.36-1  
Candidate: 0.36-1  
Version table:  
*** 0.36-1 100  
    100 /var/lib/dpkg/status
```

There is no error in logrotate.service status.
