grub-install : attention : Le système de fichiers « ext2 » ne prend pas en charge l'embarquage.
grub-install : attention : L'embarquage est impossible. GRUB ne peut être installé sur cette configuration
 qu'en utilisant les listes de blocs. Cependant, les listes de bloc
s ne sont PAS fiables et leur utilisation est déconseillée..
grub-install : erreur : diskfilter writes are not supported.

- biliz:
  - le dépôt APT Chapril a été réactivé (il était désactivé depuis la migration à Bullseye)
  - les mises à jour des paquets (noyau & chapril) ont été réalisées
  - j'ai supprimé des caches dans /root et /home/mobilizon afin d'avoir assez d'espace disque pour faire la mise à jour. Pour relibérer de la place, il faudra supprimer le paquet linux-image-5.10.0-18-amd64 après le prochain redémarrage de la VM.
